Comentários / Comments

Thalita successfully completed her primary school education of nine years with an excellent academic record. She is a good student and we are happy that she did so well - regardless of the family conditions that were often extremely critical. In the meantime the family life is more balanced now which has a good effect on the children.

Thalita shall continue her school education at a states school and therefore the funding for her is no longer needed. She already turns 17 in March 2021 and in the states school she will find many more classmates in her own age. That is nicer for a teenager.

Marlies, we thank you from the bottom of our heart for supporting Thalita all those years. With the vulnerabilities in her younger life, it was important to take her into Projeto Uerê and under the wings of Yvonne, who always kept an eye on this family. Before, she was floating around and on the edge of becoming a streetkid. It was also important to have her in the private school, where she learnt valuable things for her future life. She therefore will do very very well in her new school.
